

THE NORTHERN TRIBUNE AN INDEPENDENT WEEKLY NEWSPAPER

Published every Thursday at Grande Prairie, Alberta. The Tribune's aim is to thoroughly "cover" the local news in attendance at every general and parties, and to aid in the development of the Peace River Country and help make known the Northern Plains' many advantages as a home-land. All news is printed without intentional distortion. The paper's opinions are expressed only in its editorial columns.

Letters for publication are welcomed. A pen name may be used, though correspondence must be signed with proper name, not necessarily for publication, but as evidence of good faith. In publishing a communication, The Tribune does not imply agreement with any opinions contained therein.

THURSDAY, JUNE 20, 1935

A TRIP TO THE TOWN OF PEACE RIVER

On June 6 it was my privilege to visit the town of Peace River, the first in three years, the trip being made to attend the convention of the Associated Farmers' Trade. My traveling companions were: Mayor Tooley, the wheat, and Tom Lawley, president of the Grande Prairie Board of Trade, and J. E. Thomson, all most congenial gentlemen.

The trip both ways proved most delightful. Everything was so green. Nature was at her best. The town of Peace was rushing on to the Arctic with a depth of forty feet of water, silently and fearlessly.

The work on the new tower and approaches to the ferry landing was almost completed. It was found necessary, due to the fact that the hill directly opposite the ferry landing, the threat to the town of Peace, to build a new landing place some six hundred feet up the hill.

About 7 o'clock we arrived at Fairview and had supper at the hotel. The honey hotel room was very comfortable. Mr. Adams, the hotel owner, was shown through the hotel and one of the party I think it was Tom Lawley observed, "You can see the touch of a woman's hand. Everything is so neat, and the food is so good."

At supper the Mayor looked over the dessert section of the menu and, turning to the waitress who gave us service de nuit, he said: "I will take some flapper pie and he did."

As a piece of information to our readers who do not already know, Mayor Tooley is a bachelor. The order caused a great deal of amusement. However, his worship took all remarks good naturedly and said, "I have finished his pie. 'That was fine!'"

On this side of Berwyn we had a puncture and decided to stop at Berwyn and have the tire mended. While the tire was being fixed we took advantage of the time and went over the main streets of this important town and talked with several of the leading citizens.

Mr. Lawley suggested that I go into the Berwyn hotel to see the manager. Some remarkable carving executed by the general proprietor, T. Castberg, on being introduced to our mission, the proprietor graciously showed us the various articles on which he had carved some wonderful designs. These articles included a chest for holding sewing, several tables, a large chest, work, Mr. Castberg carried out some of the traditional art of his people (and Norway), in which the dragon occupies an important place.

We were also shown a picture of a beautifully carved gavel made for the Legion of Frontiersmen. This gavel is making the rounds of the British Empire. It was first used by the Spirit River squadron, the fastest north squadron in Canada. At present it is in New South Wales. When it has been used by the various squadrons in the dominions it will be returned to Edmonton and later presented to the Legion of Frontiersmen in London as a goodwill gavel from Canada.

Where you trained in carving? I asked.

"No," the hotel man replied, "I do this as a hobby."

While Mr. Castberg successfully runs the most modern hotel in the north, it is more like a large home. I gathered that he really lives on the outside of his business and takes his pleasure in his art.

Finally the tire was fixed and we were on our way to our destination. A great deal of work had been done on the hill leading to the ferry landing since my last visit and I tried to visualize what the Dunvegan Hill would be like if it too had been gravelled and otherwise improved. One thing is certain, there would have been a lot of justifiable string language eliminated as motorists fought mud.

At Peace River we had the pleasure of meeting many old friends, among them being A. Stuter, Albie Brick, E. C. Marks, J. W. Sawyer, Mr. and Mrs. Tom Berwick, and Len Watts, all formerly of Grande Prairie.

Mr. Watts, who is manager of the northern branch of Campbell, Dean & Moore, kindly took the writer for a ride around the town. The trip along the river was very pleasant.

This residential street has many beautiful residences among them being a new home which will shortly be occupied by the Watts family. There may be more picturesque towns than Peace River, but I have never seen them.

I also had the pleasure of meeting my old friend Page Rideout and we recalled the time when we used to sit on his apartment and discuss the most vexatious questions of state. It might be mentioned in passing that Page contributed to the debates at the convention.

Another old friend met was Archie McMillan, a former lumber inspector. I took time off and went through the electric light plant. Here Harry Callahan, who hails from the writer's native county of Huron, and Jim Mitchell, who comes from Paledon, E. J. Thompson's old home town. I saw an up-to-date plant, done in a good business.

I had a very interesting chat with a party from North Star in the Battle River country. Among the party were D. Dube, C. Egenberger and Terry Long-Hodge.

The party informed the writer that the Battle River country has about 5000 people and last year it produced 300,000 bushels of grain.

They further stated, in answer to a question, that there are 2000 people in the Battle River country, with 350 children in attendance at the general stores, two garages and a telegraph office at Northview.

A hospital and road improvements are badly needed, stated the visitors. On the way home the trip proved equally enjoyable as the journey out. A stop was made at Fairview for dinner. The Mayor again ordered flapper pie, but the party ruled him out of order, believing that one helping of this type of pastry in three days was sufficient. The Mayor bowed gracefully to the ruling.

It seemed from the highway that there is considerably less land in crop than last year and a huge amount of summer-fallow to be done.

PREMIER RED LIVES DOGS

On Sunday I had the pleasure of a chat with the provincial premier, R. G. Reid.

As we were discussing things in general, my building, "Rusty," found his way into the conversation. The conversation immediately shifted to man's greatest friend, the dog.

I found that the Premier was a lover of dogs, and as the conversation proceeded he told of a wonderful collie dog which he once owned while on his farm. This dog, he said, had almost human intelligence and was as good as several men when it came to driving cattle.

The Premier said he thought it was cruel to own a dog in the city, and for that reason, much as the family would like to, they would never have one at their Edmonton home.

When this was said and at the same time patted "Rusty," right there a common house dog struck so far as the Premier was concerned. Whether the Hon. R. G. Reid wins losses or draws at the next election, I will always think kindly of him.

A WHITE FIELD MOUSE

On Monday last two boys from the East End, Bernard and Art Blinke, brought a white field mouse to The Tribune office, which, with the help of their brother Earl, caught in a trap, the brothers caught two more. The boys are still hopeful of making it, however, and are on the lookout.

The mouse brought in is as white as a sheet, and has pink ears and paws, as the writer knows there is no distinct breed of white field mice and the old one is considered a "sport."

WHAT A DIFFERENCE PAINT MAKES

On Saturday I took a trip west and my attention was arrested by a set of buildings on the corner of the Hotel Aerodrome. The buildings were in the hands of the V. Croken of Grande Prairie. The thing which particularly drew my attention was the fact that the buildings and home had been recently painted, giving to the buildings a freshness and attractiveness that is very pleasing to the eye.

We hear a lot these days about an overproduction of this and that, which no doubt includes paint, and I thought what a difference it would make in our countryside if all farm buildings and homes were painted. Given purchasing power, the farmers and town people would do this very thing. There would be no talk of overproduction of paint, in fact the factories would be working night and day.

Of course it is much less than the cost of paint or oil, but the grace of God is in courtesy.

—H. Balboa.

IN THE TRIBUNE'S MAIL BOX

To the Editor of The Tribune.

Day I chip in for some time on this political battle that is going on re Social Credit and U. P. A. It is apparent that the big guns of the U. P. A. did not start bombarding Social Credit until it was known that Social Credit decided to contest this election. Therefore it is obvious that they are not fighting Social Credit on its merits but as a menace to U. P. A. power in this province. It is also apparent that the whole cabinet are fighting Social Credit tooth and nail, doesn't it seem absurd for them to be hiring Major Douglas to advise them, when they know darn well they don't want to be advised and won't listen to him anyway?

Then how about the U. P. A. fight against Capitalism? We don't hear much about it nowadays. I didn't hear Capitalism mentioned at the convention in Edmonton, nor they are too busy fighting Social Credit, who are putting up the greatest fight against Capitalism I have seen yet. How the capitalists must laugh at the U. P. A. fight.

Mr. Aberhart is criticized for not having political experience, etc.; too much of a farmer, etc. I don't know. Having no political views previously I am not sure of his political views. He can't see over, and is able to see clearly what all need.

This space, Mr. Editor, in which you allow the public to express their views is a common house dog. I have seen yet, how the capitalists must laugh at the U. P. A. fight.

Timely Hints From the Beaverlodge Sub-Station

By W. D. Aikins

"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

Still the skeleton lodge is a thing of beauty.

Plenty of early moisture is demanded by the hay crop.

A ten-foot pin-herry bush has been a towering amount of beauty.

Wheat suffered considerably last winter but the Oriental (spinae) again excels in hardiness while scarcely second to Van Houtte for appearance, even were both equally well adapted.

Considerable interest is being shown in bee-keeping in the Peace River and adjacent districts. In many places there is from spring to fall an abundance of native flora that will support one or more colonies and yield an appreciable surplus of honey.

The native flora of the district is insufficient to support large commercial colonies but that should not discourage one from keeping a few colonies to gather what nectar is available and thus produce for home consumption.

Native flora is not the most desirable food.

This sounds like beekeeper's talk and it is, no less a personage than C. H. Goodenough, Dominion Apiarist, being the author.

Spring seeds have been opened exceptionally early at Fort Simpson this year. Mrs. J. Duff's garden has been planted on May 3. Snow and severe frost occurred just afterwards, the thermometer falling to 7° F. and the ground being covered, but nothing seemed to be injured. Potato sets with good sprouts survived. Rain was needed at the beginning of June.

What happened last winter to the green ash? In at least one other be- fore the Russian beetle, the green ash species was extensively killed but by what? In former years it had seemed

to be immune from rabbit attack while other species looked it suffered severely. Last winter, when rabbits were comparatively scarce on the prairie, undisturbed green ash were nearly all girdled close to the crown while Russian poplar were mostly unscathed. Mice, of course, were extraordinary numerous and mouse work was expected although most of the girdling was not quite at the ground. There is always something to

Birch Killed By Yellow Gap-Sucker

Birch planted twenty years ago have grown to be large and beautiful trees but something makes holes through the bark at the top of the trunk where the branches begin.

When the holes get so numerous that they circle the tree it dies. Nearly all the white poplars around my house have died from holes bored in the trunk but these holes are scattered rather than in rows. The poplar seems to die from bleeding to death through these holes.

These holes are much healthier. R. G. W. Althaus, Alta.

There can be no doubt, replies Prof. E. H. Strickland, but that these are attacked by the yellow-bellied sapsucker, which is a wood pecker that has degenerated in its longer perform their normal function of taking grubs out of the trees but now they are content to nibble at the sap of the trees. The only control measure suggested is the employment of a gun.

Rabbit Repellent

My shrubbery has come through in fair condition. Of course one expects the usual depredations of Brer Rabbit, but the Russian beetle, the green ash species was extensively killed but by what? In former years it had seemed

were wrapped round with tar paper, which was satisfactory.

J. A. D. Colinton, Alta.

Note:—We are interested in results of the application of grease and oil to protect Russian poplar from rabbits. We have not yet been able to make that effort, and have been afraid to apply too much for fear of killing the trees. Sometimes it has seemed only to grease the bark.

Tar paper is fairly effective against rabbits but we are always cautious about using it. In cases where we have used it we have taken the precaution of covering it with ordinary building paper so as to change the colour to one less absorbent of solar heat. Wrapping with building paper is pretty effective where the rabbits are not excessively numerous and hungry.

Contagious Abortion Suspected

Cows shipped in from the Lower Mainland did well but I had some trouble with the breeding. Two cows dropped their calves two and three months, respectively, after being bred.

Afterwards, a man told me that all cows shipped in here from the outside would lose their calves. He said that he owned cattle all his life and this is the only time he has ever known a cow lose a calf.

Really, Mr. Davidson, deserves a dose of sympathy when facing these things. It is not his fault, but the attitude of his personal imagination when confronted with the other criticism.

Fortunately—or unfortunately for him—Davidson is not exempt from criticism. He is not exempt from criticism for his indirectly admitted in it that he is not a professional man.

This illustration may be over-simplified in some respects, but it is understood. Most transactions are more complicated, involving bank loans, deferred payments, and so on, and such like, which make the consideration of the problem more confused, but in the end all come back to the simple principle of the fluctuation in back credit from time to time, but in the long run the only way to keep the balance sheet in balance is to keep the credit in balance.

Mr. Davidson keeps on saying: "The capitalist system may not be functioning properly, but the real cause of the trouble is not to be found in the irregularity in the flow of purchasing power. The diagnosis is not a disease. The theory is based on a fallacy."

Mr. Davidson from his retirement seems to pose as an official economist. He is satisfied to say that the portion of our purchasing power which has been destroyed is very small, and he is also contented to say that the capitalist system may not be functioning properly. Just fancy the use of the words "may not be functioning properly" in connection with the dropping of infected animals. Strict sanitation is there, in order to keep the system completely all aborting cows or those showing symptoms of approaching abortion. The separate uterine, cervix, vulva, etc. Be careful about carrying infection on boots, clothing, etc. Run or bury deeply with quicklime all aborted fetuses and subsequent discharges and thorough disinfection of the premises. Be careful not to place the nature from the aborting cows. The others can be by any chance saved.

The risk of aborting cows is not believed to cause miscarriage in humans but it sometimes, although rarely, causes in man a disease called undulant fever formerly known as Malta fever. For this reason and because of its economic loss to the cattle industry and because of its persistent, insidious and abominable character contagious abortion of cattle is to be trifled with.

Of course these two cows may have aborted from injury and if so they may not carry the bacteria which cause abortion at all, but all but one of the abortion is an outlined above.

The author has been exposed with this disease on a semi-public farm he once managed in the East. It persisted a long while, though on a recent revisit twenty years after he left he was told that it seemed to have run itself out, the cows apparently becoming naturally immunized in time. But the loss before that was heavy and more or less recurrent.

Mr. Van Houtte and Mr. Brooks were over taking up the wire on his homestead.

Mr. and Mrs. Gibbons, Mr. and Mrs. Elliott were week-end visitors at the home of Mrs. H. Riggs.

Quite a few from over here attended the Social Credit meeting held at Watrous on Monday night. They report it to be only a matter of time before we are all the recipients of \$25.00.

The attendance at Sunday school last Sunday was larger than ever and Sunday school is proving a great success.

It is evident that the mosquito population is on the increase as several have been seen in this community in the last few days. Judging by their voracious appetites, we presume they have spent a very hard winter.

GOODWIN

GOODWIN, June 11—We are glad to report that nearly every crop in this district is in.

DANCE AND BOX SOCIAL, JUNE 21

On June 21 the Goodwin Social Club met at the schoolhouse. During the meeting it was decided to hold a dance and box social on Friday, June 21.

As soon as the meeting was adjourned, supper was served. After which progressive whist was played. Mrs. Wm. Macdonald won the ladies' first prize and Walter Thew the men's. Consolation prize was won by Mr. A.

SOCIAL CREDIT

By A. C. LeRiviere

The Edmonton Bulletin recently had this to say:

The Bulletin today begins a series of articles dealing with Social Credit, and more particularly with the Aberhart plan, written by W. M. Davidson, one-time member of the Alberta Legislature and for many years editor of the Calgary Albertan.

In his retirement he has continued his interest in public questions and has made an exhaustive study of Social Credit and the plan suggested for Alberta.

It appears that our population should be thankful to Mr. Davidson for such nice intermittent effusions of kind regards towards us all, and our present and future perplexing economic problems.

These articles Mr. Davidson says this:

"A minor criticism of all Social Credit plans is that they are all hard to understand, because the authors of them seem to be speaking in a different language which is not of our kind of English and is not of our kind of English."

Really, Mr. Davidson deserves a dose of sympathy when facing these things. It is not his fault, but the attitude of his personal imagination when confronted with the other criticism.

Fortunately—or unfortunately for him—Davidson is not exempt from criticism. He is not exempt from criticism for his indirectly admitted in it that he is not a professional man.

This illustration may be over-simplified in some respects, but it is understood. Most transactions are more complicated, involving bank loans, deferred payments, and so on, and such like, which make the consideration of the problem more confused, but in the end all come back to the simple principle of the fluctuation in back credit from time to time, but in the long run the only way to keep the balance sheet in balance is to keep the credit in balance.

Mr. Davidson keeps on saying: "The capitalist system may not be functioning properly, but the real cause of the trouble is not to be found in the irregularity in the flow of purchasing power. The diagnosis is not a disease. The theory is based on a fallacy."

Mr. Davidson from his retirement seems to pose as an official economist. He is satisfied to say that the portion of our purchasing power which has been destroyed is very small, and he is also contented to say that the capitalist system may not be functioning properly. Just fancy the use of the words "may not be functioning properly" in connection with the dropping of infected animals. Strict sanitation is there, in order to keep the system completely all aborting cows or those showing symptoms of approaching abortion. The separate uterine, cervix, vulva, etc. Be careful about carrying infection on boots, clothing, etc. Run or bury deeply with quicklime all aborted fetuses and subsequent discharges and thorough disinfection of the premises. Be careful not to place the nature from the aborting cows. The others can be by any chance saved.

The risk of aborting cows is not believed to cause miscarriage in humans but it sometimes, although rarely, causes in man a disease called undulant fever formerly known as Malta fever. For this reason and because of its economic loss to the cattle industry and because of its persistent, insidious and abominable character contagious abortion of cattle is to be trifled with.

Of course these two cows may have aborted from injury and if so they may not carry the bacteria which cause abortion at all, but all but one of the abortion is an outlined above.

The author has been exposed with this disease on a semi-public farm he once managed in the East. It persisted a long while, though on a recent revisit twenty years after he left he was told that it seemed to have run itself out, the cows apparently becoming naturally immunized in time. But the loss before that was heavy and more or less recurrent.

Mr. Van Houtte and Mr. Brooks were over taking up the wire on his homestead.

Mr. and Mrs. Gibbons, Mr. and Mrs. Elliott were week-end visitors at the home of Mrs. H. Riggs.

HEALTH

HAEMORRHOIDS

Haemorrhoids are distasteful to the office of the rectum. They may be external, or internal, or combination of both. The internal are covered by the mucous membrane which lines the bowel, while the external are covered by skin.

Haemorrhoids may cause considerable discomfort, and for that reason, they are of importance. The most common symptom is bleeding. Besides being the most common symptom, it is by far the most important because bleeding is also a common early symptom of cancer of the rectum.

Many a life is lost needlessly every year as regards the leakage of blood from the rectum, the individual thinking in this way to have haemorrhoids. It is quite possible for the two conditions to exist at the same time in the same patient, so it is advisable to have a physician examine the rectum, no matter how slight, from the rectum.

Excesses, sometimes itching and sometimes a sense of constriction, experienced with haemorrhoids. Real pain usually means a complication in a fissure (tear) in the lining of the rectum, or a small vein forming a tumor under the skin. Internal haemorrhoids tend to prolapse or protrude, but they can usually be pushed back by gentle pressure.

The cause is to be found in any condition which interferes with the free flow of blood in the veins of the rectum. Haemorrhoids are a frequent complication of pregnancy. They are sometimes a result of constipation.

Attention to diet with regular stimulation will correct the condition when it has arisen from constipation. The

Diogenes was right!

When they asked the old philosopher what wine he liked to drink, he said: "That which belongs to others!" . . . whether you call on others or they call on you, there is a glow that warms the heart in the offer of a glass of good wine . . . and the glow is warmer if the wine be HERMIT PORT or HERMIT SHERRY . . . for, these products of Canada's largest winery are also the product of Canada's most skilled vintners . . . they are smooth and mellow with sixty-one years of experience . . . FORTIFIED WITH PURE GRAP BRANDY . . . and good for health as well as rich to the palate.

HIGH PRAIRIE

GONE VISITING

HIGH PRAIRIE, June 17.—A number of local people took advantage of reduced train fares to visit the East. Mrs. C. E. Paine, Mrs. Mabel, Margaret, Helen and Joe left for Picton, Ontario, where Mrs. Paine's aged father is very ill.

Don Irish, with his children, Gladys and Madeline, has gone to the Atlantic seaboard on the first visit to the old home in many years.

Mrs. Ireland and son, Pat, with his wife and children, Mabel and Leonard, are en route to the Pacific Coast by automobile at present.

Herb Boshel has left for his home in Switzerland, to spend the summer on Lake Lucerne.

JUNIORS HOLD MEETING

The Junior U. F. A. held their monthly meeting June 14, at the La Place home, north of town.

Robert Kirkness is again director for the Junior U. F. A. in Peace River, appointed at the Edmonton Conference.

BUILDING NEW RESIDENCES

Edmar Brodie is erecting a new residence on his farm just west of town, which will be completed by July 1.

A new residence for Mrs. J. A. McLean will also be built on the Albert Hill farm this summer.

John Hanlon returned to his home on Tuesday, after an absence of almost a year on the prairies.

HOPES TO FORM CALF CLUB

Dist. Agric. Extension "Premises" made a trip to High Prairie recently in the interests of the Junior Calf Club. He will hold a meeting in July, when he hopes to organize a calf-feeding club, with the object of shipping a carload of fat steers.

The Van Der Mark family moved from High Prairie to the homestead on Monday. This report that both very wet and mosquitoes had.

Mrs. Walters, of the Hannan Hotel, was forced to come to town for an operation at the High Prairie Hospital recently.

VAN WORKERS HAD TO WALK

Misses Phillips and English, of the Anglican S. S. Caravan, moved away on Monday, after visiting home-steaders on the West Prairie River and Glenora districts. It was necessary for the young women to travel on foot, since many roads are impassable for car or wagon because of mud and water.

TWO NEW GIRLS

Mrs. and Mr. Albert Hill are the glad parents of a baby girl, born May 24.

Mr. and Mrs. Guy Clark are also rejoicing over the arrival of a new girl, named "Cathy" May.

The father of Mrs. Audrey Arlidge left on Tuesday for North Dakota, after spending the winter with his daughter and family on the homestead.

NO TRACE OF MISSING BELTS

No trace of the missing belts, property of a Jewish fur buyer, has yet been reported. The furs, packed for shipment, disappeared from the Butler Building several weeks ago.

CROP REPORT

Many farmers are still seeding oats, and gardens are just nicely above ground in most places. Potatoes and beans were blackened by frost north of town one night last week, and quins and flies are proving the worst pest in many years, due no doubt to the excessive frost and dampness.

Mrs. Dave Kirkness was in town on Tuesday to attend a meeting of the W. L.

CELEBRATE 24TH ANNIVERSARY

Mr. and Mrs. Herman Van Der Mark are celebrating neighbors on Thursday, June 20, in honor of the 24th anniversary of their marriage at Hbaca, New York.

TIME OF TRIAL FOR THIRTY

Departmental examinations started in High Prairie High school on June 14 and constitute a time of trial for some thirty young people participating in them.

MANY PUPILS AT CARAVAN S.S.

The Caravan S. S. met on Sunday at the O. W. Randall home, with an attendance of 16 pupils. On June 16 four teachers were present—Mrs. Hill, Mrs. Lella Randall, Miss Hill, Miss Kirkness and Mrs. Randall. Five new pupils were added to the enrollment—Audrey and Owen Kenning, Alice Tansky, Nick Tomko and John O'Rourke, which makes a total of 56 pupils.

All children are making books, containing the creed, prayers and commandments, with pictures to illustrate.

Frank Williamson and Jim Bell have taken homesteads on the Rimniet and leave for Delton on Tuesday.

Mrs. Chas. Witty called on Mrs. Herbert Dunn on Sunday afternoon. Mrs. Dunn lives south of Fort St. John on a vacation. Mr. Hatched of Grande Prairie and wife, and Mrs. Chapman of Reno on their second vacation since settling here.

NEWS FROM ASPEN GLEN

AUTO CAM

PAINT. June 17.—With spells of rain traffic is sporadic and the going along in very good, but when back very bad.

When road conditions must cars speed along as though scared. Should it rain—then what?

Among many passing were the Campbells of River, moving to Vancouver; Smith, north of Fort St. John on a vacation; Mr. Hatched of Grande Prairie and wife, and Mrs. Chapman of Reno on their second vacation since settling here.

The total shipments of certified potatoes from the 1934 season amounted to 1,328,745 bushels, 728,552 bushels being shipped during the months of January to May inclusive, and 600,193 bushels from the fall to December 1st.

LAKE SASKATOON

Held folk

We are pleased to say nothing is more or less finished in our district. It has been very drawn out this year, but we still have hopes.

HELD HANDBALL TOURNAMENT

But to break the monotony we play handball and handball. A very lively handball tournament took place at our school last Saturday, when some Grande Prairie boys came up for a return game. Grande Prairie won in the doubles. When our boys went to Grande Prairie the winners were vice versa.

GOT A TIMING

Sunday last Lake Saskatoon took a softball team to the ranch to play against Meadowville. We got a bad timing, but never mind, we don't give up.

W. A. PUTTING ON BIG FROLIC

Oh, yes, and don't forget the W. A. are holding a horse-drawn tournament at Mr. Lewis on July 3. There will be horse-drawn for the hot, clock off for the ladies, and a line-up of games for the young folks. Hot dogs, coffee and ice cream will be served at Lewis' school place. Everybody come and enjoy a pleasant evening.

LOOKING FORWARD TO PICNIC

Examinations are in full swing these days, few more days and they will be over and will be glad! Then we will be able to enjoy the school picnic on June 27 at Cooper's point.

CAR OVERTURNED IN DITCH

Mr. and Mrs. Norman Anderson had a narrow escape when their car turned over in the ditch when they were on their way to Beaver Lodge. Luckily no one was hurt and no damage was done.

Mr. Webber from Lake Saskatoon and his family in the Municipal Hospital for the last week or so as a result of having injured his back. We are glad to hear of his recovery. Mr. Webber, and hope to see you up and around again.

Mr. Arthur Smith entertained a number of friends in the Municipal Hospital for the last week or so as a result of having injured his back. We are glad to hear of his recovery. Mr. Arthur, and hope to see you up and around again.

INDIAN EARTHQUAKE CASUALTY LIST GROWS AS RESCUERS SEARCH FOR VICTIMS

Native and British troops are reported to be completely exhausted after days searching for dead and injured in the most disastrous earthquake to strike India this century. Estimates of dead at Quetta run from 30,000 to 50,000, including a number of British officials and Royal Air Force members who were stationed in Baluchistan. The pictures above show the results of recent tremors in Burma that also took thousands of lives.

FRANCOIS PIETRI

Former French Minister of the Navy, who was one of the political leaders called by President Lebrun to help form a government from the political chaos at present rampant in Paris.

NEW FOREIGN MINISTER

Sir Samuel Hoare, famous British statesman, who succeeds Sir John Simon as Secretary of State for Foreign Affairs. The change was caused by a shuffle in the British Cabinet when Premier MacDonald stepped out and Stanley Baldwin took his place.

The Three Recommendations Of the Douglas Report • I. V. MACKLIN

According to a recent copy of the Edmonton Journal, Major Douglas has a complete plan for the setting up of his scheme in Alberta until we have carried out his three recommendations already given. What then are these three things Alberta must do?

(1) Control of Newspapers and Radio

The Dominion now has control of radio. In this province they sell time on the radio. I believe impartially to broadcast Douglas, Aberhart, Liberal, Conservative, U. P. A. or C. C. F. theories. I fancy that as long as the Dominion is impartial it is more advantageous to us than provincial control. When and if the Dominion ceases to be impartial then we should try provincial control, which, we would hope, would be so.

Regarding newspapers and magazines, the financial ownership is breaking down. The newspapers have been and are becoming a regular "Hyde Park" of Canada in the freedom with which they allow the expression of every theory under the sun in their pages. That is what we want—a reasonable freedom, a fair chance to criticize any existing system and advocate alternative plans. We don't want a "special privilege" to advocate our plan only and chuck a potato down the throat of everybody else. That's exactly what Mussolini and Hitler have done. No, it's a bun system that can stand on its own feet without the props of monopoly against the winds of criticism. A more accurate description of a dictatorship is that they do not allow the winds to blow.

(2) A Provincial Credit Institution.

This would be a provincial bank. It would be a bank among the Canadian banks of interlocking banks, trust companies, insurance companies, and what not. The only kind of financial bank that could exist in Canada would have to have its roots and teeth and claws of sufficient strength to overpower any or all the banks of Canada. It would not be a bank—it would have to be a Canadian bank. The only power that can harness the wolves and turn them into useful huskies for our dog sleds is the sovereign power of the government of Canada backed by a majority of the people of Canada.

The currency and credit structure of a nation is essentially a national matter. I know of no province in any nation that has not side by side been allowed by the nation to establish and maintain an independent money system. If those to whom our national government have by charter given a monopoly of the currency and credit business, have abused their trust, then the Canadian people must demand that the Dominion government withdraw those privileges and issue currency and credit itself. Let the nation supply her governments and her people with the necessary "medium of exchange" of cost, which would be a fraction of one per cent—not three or seven per cent. The billion dollar per year interest burden on the backs of the Canadian people is crushing the life out of Canadian business and taking the joy out of life for many—add per cent of the people in order that the two per cent may have millions of income more than they know what to do with.

No single province alone can cure a national problem. We can put the way in our C. C. F. program. We need to be wiser and wiser for Canadians of like mind. Abortive, ineffectual attempts would be as bad as our present indifference in other provinces. But are they indifferent? Perhaps of exactly the same kind. It has come to be a question whether we are to be ruled by financiers or by the elected representatives of the people.

Hundreds of workless men are now drifting in Ottawa from the province of Ontario, who promise "W. H. and Wages" for all a few short no time. The decision rests in Canada. Think God for those who are beginning to see the real issue in the coming Dominion election. Is our financial dictatorship going to triumph over our political democracy and drag her dead body in the dust, behind a "silver-haired" chariot wheels? Or are the 98 per cent of the people of Canada and the elected representatives thereof whether they be Grit or Tory or C. C. F. or Dominion—make up and muzzle the mouths of the wolves? There are signs of an awakening, but up to recently a majority of Canadians have wanted to maintain this system of exploitation in the hope that some time they would be the exploiters.

PRINCESS ROYAL TO UNDERGO DIFFICULT OPERATION

A report from London states that the Princess Royal, Countess of Harewood, only daughter of King George and Queen Mary, has entered a nursing home in order to undergo an operation for exophthalmic goitre. Above we see a picture of the Earl of Harewood and the Princess Royal with their two children, while inset is a close-up of Her Royal Highness.

FRENCH FASCISTS READY TO SEIZE GOVERNMENT

Unless the political situation in France clears up within a few days, observers predict there will be a march on Paris by members of the Legion of the Holy Cross. Fascist war veterans group, headed by Colonel Alain de la Rocque, right. De la Rocque is shown, at the left, leading a parade of his followers. He may duplicate Mussolini's feat and seize government.

JAMES BRADDOCK GETS DECISION OVER MAX BAER

Here are Max Baer and James Braddock, who clashed in Madison Square Garden's Lane Island Bowl on June 13, when Braddock won the decision, being awarded seven rounds to Baer's six. Two rounds were even. Jimmy Braddock is now heavyweight champion of the world.

OVERDUE REPAIRS

John Bull (to Mr. Baldwin): "That's the way, Stan! I was beginning to feel a draught!" (Mr. Stanley Baldwin announced in the British House of Commons the measures to be taken for the expansion of the Royal Air Force.)

TAKES THE HEALM

Here is a picture of Fernand Boulson, president of the French Chamber of Deputies, who has formed a new Government to succeed the Flaminio cabinet which resigned.

CLEVER SHORTSTOP

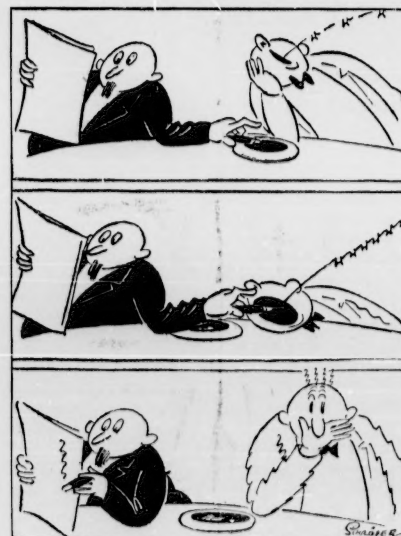

In addition to being one of the cleverest outfielders in the National League, Ralph Noye, of the Brooklyn Dodgers is a very useful batter. Last season his average was .305.

At the 19th Hole

No doubt due to the bad-looking sky, Richmond Hill golf course last Sunday was not as congested as a week ago, though at one time over thirty cars were counted lined up at the club house. In the early part of the day the wind was quite strong, blowing from the southeast, but calmed down somewhat in the afternoon. The mosquitoes were quite troublesome at times and probably spoiled a number of cards.

The linked two-ball foursomes is now down to the final stage and will be completed on Sunday.

A. Wishart and Mrs. C. C. Fleming had a hard battle against P. J. Tooley and Mrs. Beattie Watson and before being decided the game went to the third green in the second round. They were all square at the seventh, saving the third hole in four. Tooley-Watson winning the first, second and seventh; Wishart-Fleming the fourth, fifth and sixth. The latter couple won the eighth with a 5 against an 8. At the end of the round Tooley-Watson came right back and evened up the match with a 7 to 10. On the second round the first two holes were halved with sixes and the other hole was made in 4 by Wishart-Fleming against a 5 by Tooley-Watson. Allen claims the match should have ended in the ninth—only for those pesky mosquitoes.

Another match that held interest was the one between Jack Sissons and Mrs. B. Bennett against Jack McKay and Mrs. Sinclair. At the end of the sixth the latter couple were two up. McKay landed in the rough on his drive from the seventh tee and his partner played a provisional ball and it was questioned after the hole was played how it should be counted. It was settled by Pro. Stevenson. In the final play it was 2 to 2, but in match play only 2, so the hole was won by McKay-Sinclair, making it 2 up and 2 to 2.

A boy had to be given in the semi-final round to McKay-Sinclair, who will meet the winner of Wishart-Fleming vs. Bennett-O'Dell. This match was scheduled for Wednesday afternoon, but the heavy rain came on and now probably will be played the end of the week.

The Nelsons, who are an ace of making a hole-in-one, but his ball hit the pin and bounced back about twelve inches.

Francis Donald and W. O'Dell took out John J. D. Matthews and Geo. Duncan for a round, but the latter pair won by a comfortable margin. Francis was driving like a tone well, but his short game bothered him.

A. B. McMillan and Jim Evans had it out with C. Cady and "Clay" Butchart in an eighteen-hole match. The first round was a draw, but on the right side of the ledger. No records were broken in the two rounds.

Reasmith, Wemley and Beaver Lodge were all represented on the course last Sunday.

Quite an important one has been made on the greens. A good sprinkling of sand makes it more sure of putting hold to the ball.

"Clay" Butchart and Geo. Duncan gave Pro. Stevenson a work-out on Sunday, but the scores were not as sandy would like to see them. Sandy and Duncan tied with 46 and Butchart had a 49. The card:

Stevenson 5 4 4 5 6 6 6 5 5-46
Butchart 6 5 4 5 5 5 6 7-46
Duncan 7 6 5 4 5 5 5 4 4-40

PREMIER REID AND HON. HUGH ALLEN SPOKE AT G. P. SATURDAY NIGHT (Continued from Page One)

of the world. "It just can't be done," he declared.

Defending the record and policy of the government, Mr. Allen quoted figures to show that Alberta was in a much better position than any other province in western Canada. He stated that Alberta's debt had increased from the Financial Post, which stated that Alberta's debt had increased from the exception of Prince Edward Island, and added, "I ask you to keep these facts in mind."

"When an opposition goes to the people, it does so with promises, said Mr. Allen. A government stands on its record." He then traced the record of the present Alberta government, pointing out the public services built up, services which he said the government was justly proud of adding, "During the 14 years this government has been in power there has been no misappropriation of money."

Sale of the northern railways was mentioned and Mr. Allen drew attention to the fact they were sold for \$2,000,000 more than the figure quoted only a few months before the sale.

The land settlement policy was then discussed by Mr. Allen, who said the Liberal opposition charged that the government had made a mistake in not throwing land open to all Canadians, but he contended that the government was not doing this. Peace River fifty per cent in relief.

Soil survey was another achievement of the government referred to by the speaker.

Dealing further with the land settlement policy, the Minister of Lands and Mines said that a fee of \$50 had been set, but in view of conditions the fee was reduced to \$10, the same as under the Dominion government.

Mr. Allen had been made, he said, which makes it possible for a man to remain on his land by paying the fee. The government, said the speaker, had decided to break a portion of land on both homesteads where needed. In order to give the homesteaders a push, if this was not satisfactory, it will be extended. This fee is one way of meeting the relief situation."

Mr. Allen said it is proposed further to put men in relief work camps and pay half cash, the rest to apply on money owing to the government.

The government has an example of the government's relief policy, he drew attention to road work done in the Drumheller district that could not be done by the municipality in twenty years.

Continuing, the Minister observed that the "Work for Wages" slogan is not a new slogan, but it can be put into effect in Alberta," declared Mr. Allen.

Calling attention to the Associated Builders of the province, he stated that no one realized the value of travelling at the highway money that he did and he repeated the statement that the Peace River had been neglected, education, hospitalization, and other things that had been neglected.

He then took up the suggestion of the Associated Boards of Trade that Slave Lake be lowered in order to provide a better possibility, but he said, had been explored several years ago by federal government engineers, who advised against such an attempt.

Mr. Allen next discussed Social Credit. In his opinion it was just another of those theories which find their way to the surface during a depression. "If such a theory was attempted it would be an absolute revolution in the life of the people of the province."

Developing the subject further, the Minister pointed out that \$25 a month to every adult in the province would involve a sum of \$120,000,000 annually. The province has \$12,000,000 a year, he said, "so it will be seen that Mr. Aberhart's plan to raise the huge sum of \$120,000,000 is impossible."

In this connection, the speaker asked why the Social Credit plan was not put into operation in the city of Calgary. "I believe Mr. Aberhart would say it is impossible. It is equally impossible in this province. It is the general opinion of business men and those who have made a study of the question, that if such a plan was put into effect in this province it would mean ruin."

The proposal appeals to many people in different ways, said Mr. Allen, who advised against such an attempt, that things could not be worse, and why not give the proposed plan a chance.

"Conditions could be much worse," remarked the Minister, who added that a government could not last a month under such a system. "Alberta would lose possibility of development, and the Peace River would suffer the most. The check to the province would be nothing in the check given to the north country."

Continuing, the speaker said: "We hope to see the coast outlet built. If you put such a scheme into effect it would destroy the credit of the province and the outlet would not be realized in the lifetime of the average man."

Mr. Allen said that the government was justly proud of adding, "During the 14 years this government has been in power there has been no misappropriation of money."

Mr. Allen said that the government was justly proud of adding, "During the 14 years this government has been in power there has been no misappropriation of money."

Mr. Allen said that the government was justly proud of adding, "During the 14 years this government has been in power there has been no misappropriation of money."

In conclusion, Mr. Allen said he had lived in the constituency for 25 years, and with ease or draw he would continue to live here and work for the interest of the country. He appealed for support on Saturday night.

Mr. Allen said that the government was justly proud of adding, "During the 14 years this government has been in power there has been no misappropriation of money."

The Millerton school children had a wonderful time at the river in a week-end camp sponsored by Miss Brakine. The Millerton boys are organizing a ball club and held their first practice Sunday last.

Norman Bennie and Hodgins continued Mr. McAllister's crop today. Best success is training Frank Donald's horses here for the July 1st sports in the Prairie.

W. Harper returned on Tuesday's train from Edmonton. He reports things very quiet in Edmonton, with lots of rain around the Capital City.

At The Capitol

No Greater Glory
